	Industrial applicability (IA)	Claims	1-16	YES
		Claims		NO

2. Citations and explanations (Rule 70.7)

The citations are numbered in the same order as in the international search report.

The present application relates to a process for preparing 1-octene from butadiene-containing starting products. The reaction steps (listed in the application from (a) to (c)) are already known from D1-D2. The alleged contribution is that of the separation of the resultant products by special steps and, if required, their return to the reaction vessel. This sequence of steps cannot be derived from the prior art. The criteria of PCT Article 33 are therefore met.
